REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach and/or fairly suggest a method for determining a physical property of a log wherein a small amount of a liquid or solid is projected against the end of the log with sufficient energy to initiate a stress wave, and the time of travel of the stress wave in the log is measured in order to determine the physical property.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-12 are allowed.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Snyder et al. discloses a log cutting optimization program wherein a pneumatic hammer is used to generate stress waves in a log. Andrews et al. discloses a log cutting procedure wherein a hammer is used to generate stress waves in a log. Nakaoka et al. discloses a method for measuring the tension of a grid element wherein the flow of air from an air nozzle is used to resonate the element.
